FIELD EXPERIENCE

Southern California. Validation of Global Ecosystem Dynamics Investigation (GEDI) spaceborne lidar shot locations. Established 22 m circular plots across two National Ecological Observatory Network (NEON) sites in California that corresponded to 37 GEDI shots to record species information and collect diameter at breast height (DBH), vegetation height, and LICOR LAI-2000 measurements. 2021.

Sabah, Malaysia. Led a team of four in establishing modified gentry plots to systematically subsample 1 ha areas of lowland tropical forest. Collected data on diameter at breast height (DBH), genus, and mortality for all trees > 10 cm in diameter. Used hemispherical lens to record Leaf Area Index and a high-precision Leica GS50 GPS to georeference plots for collocation of field data with high-resolution airborne remote sensing data, 2017.

Southwest Region, Cameroon. Led a team of four Cameroonian women to collect survey data on farmer decision-making and household characteristics. Interviewed agricultural companies and key stakeholders engaged in palm oil supply chain: processors, manufacturers, traders, port operatives, and retailers. Mapped palm oil processing mills and validated remote sensing classification. 2014-17.

Rwanda. Validated forest change maps and locations of refugee settlements present during Great Lakes Wars across western Rwanda. Compiled historical records to create georeferenced maps of refugee and rebel group movement and forest-related resource use. 2012.

Trinidad. Conducted monthly mark-recapture of guppies examining the eco-evolutionary interactions in *Poecilia reticulata* and stream systems. Processed individual fish in lab. Identified, marked and recorded subcutaneous visible fluorescent implant elastomer, and entered morphology data. 2010.

Bioko, Equatorial Guinea. Established nesting ecology experiment examining the impact of tidal pumping on gas exchange in leatherback nests, pit-tagged individuals, and collected nesting ecology data for the duration of the six-month nesting season. 2009-10.

Comoros & Madagascar. Conducted coral reef transects and timed snorkel surveys to determine reef health. Collected and analyzed socioeconomic and fishing bycatch data from surveys conducted in coastal communities. Led conservation education events in French in local communities. 2009.

Yellowstone National Park. Used ground and radio telemetry to track wolf packs and elk herds. Conducted field necropsy of elk carcasses to determine cause of death and wolf prey selection. Collected behavioral data on elk individuals to investigate post wolf re-introduction behavioral changes. 2009.

Catalina Island. Identified native and non-native plant species. Conducted mechanical and chemical removal of invasive species using spray-rig, backpack sprayers, and spray bottles, employing cut-stump, basal bark, drill and squirt, and foliar treatment methods. Orienteered in backcountry. 2008.
